

Flutter Developer

About Miquant

Miquant is a Vietnam-based quantitative finance and analytics startup that leverages AI, big data, and quantitative research to improve how investors access insights and make decisions. The company focuses on analyzing economic trends, Vietnam's equity market, cryptocurrency, and broader APAC opportunities. By integrating advanced data infrastructure with rigorous research methods, Miquant develops practical tools and analytics that support more transparent and data-informed investment processes in emerging markets.

Position

Title: Flutter Developer
Type: Full-time On-site supported
Location: Cho Quan Ward (District 5), Ho Chi Minh City, Vietnam
Salary: Competitive, with performance bonuses

Job Description

- Collaborate with cross-functional teams, including UI/UX designers and product owners, to transform business requirements into high-quality mobile applications for both iOS and Android platforms using Flutter.
- Architect, implement, and optimize beautiful, responsive, and high-performance user interfaces, ensuring smooth user interactions and consistency across devices.
- Integrate RESTful APIs and manage real-time data communication via sockets to deliver seamless, dynamic experiences.
- Continuously improve app performance, stability, and security through profiling, testing, and modern best practices.
- Deploy, release, and maintain apps on both App Store and Google Play, including handling upgrades and bug fixes.
- Stay current with new Flutter releases and advances in mobile technology, actively proposing enhancements to existing products.

Candidate Requirements

- Minimum 1 year of professional experience building mobile apps with Flutter, having shipped at least one production app is highly desirable.
- Understanding both iOS and Android platforms
- Solid understanding of object-oriented programming (OOP) and mobile app architecture patterns (MVVM, MVC, MVP), Git workflow, and experience integrating RESTful APIs.
- Hands-on expertise with modern state management solutions such as Provider, BLoC, GetX, or equivalent.
- Familiarity with the full mobile development lifecycle, including deployment, publishing, and post-launch maintenance.

- Strong analytical and troubleshooting skills, with a commitment to code quality and best practices.
- Proactive, self-motivated, and able to communicate effectively within a dynamic startup environment
- Basic understanding in JavaScript, TypeScript and related frameworks for web development (NestJS, NextJS) is a plus.

Benefits

- Participate in building core products in a dynamic startup environment.
- Income includes basic salary and project performance bonuses.
- Social insurance, health insurance, and paid leave according to regulations.

Application

If you are interested in this opportunity, please send your CV and a short cover letter to: career@miquant.vn

Application deadline: 15 October 2025. Applications will be reviewed on a rolling basis, so early submissions are encouraged.
