UI/UX Designer (Mobile & Web)

About Miquant

Miquant is a Vietnam-based quantitative finance and analytics startup that leverages AI, big data, and quantitative research to improve how investors access insights and make decisions. The company focuses on analyzing economic trends, Vietnam's equity market, cryptocurrency, and broader APAC opportunities. By integrating advanced data infrastructure with rigorous research methods, Miquant develops practical tools and analytics that support more transparent and data-informed investment processes in emerging markets.

Position

Title: UI/UX Designer
Type: Full-time On-site
Location: Cho Quan Ward (District 5), Ho Chi Minh City
Salary: Negotiable based on ability and experience

Job Description

- Work directly with Product Owners and Business Analysts to turn ideas into products.

- Design wireframes, user flows, prototypes, and hi-fi mockups in Figma.

- Design interfaces for mobile and web, ensuring consistent multi-platform experiences.

- Conduct user research and usability testing to optimize user interaction flows.

- Build and maintain a component library, design system, and styleguide.

- Prepare specs, export assets, and support the development team through the design implementation process.

- Propose improvements for the user interface and experience for the applications.

Candidate Requirements

- Proficient in Figma, including features like Auto Layout, Components, Prototyping, etc.

- Skilled in other design tools such as Adobe Illustrator, XD, or Photoshop.

- Systematic design thinking, creative, detail-oriented, and focused on user experience.

- Portfolio showing at least one mobile project.

- At least 1 year of experience designing UI/UX for web or mobile applications.

- Familiar with UX principles, interaction design, and basic responsive accessibility.

- Strong product thinking and ability to translate user insights into flows and interfaces.

- Self-driven, proactive, and effective in team communication.

Preferred Qualifications

- Basic knowledge of web and mobile development (no coding required).

- Understanding of HTML/CSS to collaborate with developers.

- Experience building design systems or designing for native applications.

- Interest or experience in fintech, data, AI, or securities domains.

Benefits

- Participate in building core products in a dynamic startup environment.

- Income includes basic salary and project performance bonuses.

- Social insurance, health insurance, and paid leave according to regulations.
